Peer-graded Assignment: R Markdown Presentation & Plotly

Submit by September 23, 11:59 PM PDT

Important Information

It is especially important to submit this assignment before the deadline, September 23, 11:59 PM PDT, because it must be graded by others. If you submit late, there may not be enough classmates around to review your work. This makes it difficult - and in some cases, impossible - to produce a grade. Submit on time to avoid these risks.

[Instructions](#)[My submission](#)[Discussions](#)

Create a web page presentation using R Markdown that features a plot created with Plotly. Host your webpage on either GitHub Pages, RPubS, or NeoCities. Your webpage must contain the date that you created the document, and it must contain a plot created with Plotly. We would love to see you show off your creativity!

Review criteria

[less ^](#)

The rubric contains the following two questions:

1. Does the web page feature a date and is this date less than two months before the date that you're grading this assignment?
2. Is the web page a presentation and does it feature an interactive plot that appears to have been created with Plotly?

Example Submissions

less ^

Here's an extremely minimal passing example, but we hope your submission is much cooler!
